Career Objective

Ambitious fresher with a strong foundation in Core Java, Microservices, and SQL. Passionate about combining full-stack development with AI-powered tools to improve coding efficiency and user experience. Eager to contribute to a forward-thinking team by implementing intelligent features like NLP-based chatbots.

Education

B.Tech(CSE), Krishna Institute of Technology, Kanpur	CGPA: 8.26	2026
Intermediate (12th), R.K.I.C. Shankargarh, Prayagraj	Percentage: 60.4%	2021
High School (10th), R.K.I.C. Shankargarh, Prayagraj	Percentage: 76.69%	2019

Technical Skills

- Languages: C, Java
- Frameworks: Spring Boot, Spring MVC, Hibernate, Spring AI, JSP, Servlets
- Frontend: HTML, CSS, JavaScript, React
- Backend: Java, Spring Boot, REST APIs, Hibernate
- Database: MySQL, SQL, Database Design, Normalization
- Tools: Eclipse, VS Code, Git, Maven, Spring Tool Suite (STS)
- Core CS: Data Structures & Algorithms (DSA), Operating System, Computer Networks, DBMS
- Concepts: OOPs, Collections, Exception Handling, MVC Architecture, Session Management, RESTful APIs

Training & Internship

Java Full Stack Development Training — CETPA Infotech Pvt. Ltd., Noida

- Developed projects using Java, Spring Boot, JSP, and Servlets.
- Strong understanding of frontend technologies: HTML, CSS, JavaScript, and React.
- Built applications with RESTful API integration.
- Familiar with full-stack development and basic deployment workflows.

Projects

ShopSphere – E-Commerce Platform | Spring Boot, Spring Data JPA, Thymeleaf, MySQL

- Developed a full-stack e-commerce platform with product catalog, shopping cart, and secure checkout functionality.
- Implemented Spring Data JPA with MySQL for efficient product, customer, and order management.
- Built a responsive Thymeleaf-based interface with an admin dashboard following the MVC architecture.

AI Image Creator | Spring Boot, Spring AI, React, REST APIs, MySQL

- Developed an AI-powered web application that generates images from text prompts using Spring AI integration.
- Implemented secure user authentication, REST APIs, and MySQL for storing user and image generation history.
- Built a responsive React frontend with image generation, preview, download, and prompt history features.

Bank Management System | Spring Boot, Spring AI, Thymeleaf, MySQL

- Developed banking application for transactions and account management
- Implemented authentication, session management, and MySQL database integration
- Integrated Spring AI chatbot and followed MVC architecture.

Blog API (Microservices) | Spring Boot, Spring Cloud, REST APIs, MySQL

- Developed blog management REST APIs using microservices architecture.
- Implemented API Gateway and service communication.
- Tested APIs using Postman and used MySQL database.

Certifications

- **SWAYAM–NPTEL STAR Interaction Workshop – IIT Kanpur**
- NPTEL: Java Programming
- NPTEL: C Programming
- NPTEL: Operating System Fundamentals
- NPTEL: Data Structure and Algorithms using Java
